

Quiz: BTC102

Language: en

October 9, 2025

Instructions

Answer all questions by selecting the best option (A, B, C, or D). The answer key is provided at the end of this document.

Question 1

What are the typical characteristics of a Ponzi scheme in the crypto ecosystem?

- A. Guaranteed returns, difficult withdrawals, and no referral system
- B. Low returns, difficult withdrawals, and full transparency
- C. Guaranteed returns, difficult withdrawals, and referrals
- D. Guaranteed returns, easy withdrawals, and no referral system

Question 2

What should you do to identify a phishing attempt in the crypto sector?

- A. Verify the sender's identity
- B. Rely solely on logos and images in emails
- C. Only click on links received in the email
- D. Share your private keys to confirm authenticity

Question 3

What precaution should be taken against donation scams and fraudulent lotteries?

- A. Never send money to receive bitcoins
- B. Share personal information to secure the transaction
- C. Invest to get a quick and effortless profit
- D. Always send a small amount to test the offer

Question 4

What does Pump and Dump consist of in the cryptocurrency space?

- A. Manipulating an asset through a campaign to sell at the peak
- B. Making recurring purchases to gain long-term exposure to the asset
- C. Stabilizing the market in the long term through opposing trades
- D. Massively buying an asset to support its price without ever selling

Question 5

What is the main mechanism of a Ponzi scheme?

- A. Investors receive dividends from companies
- B. Profits are generated by smart contracts on the blockchain
- C. Returns come from a real product on the market
- D. Early investors are paid with the money from new ones

Question 6

Why is two-factor authentication recommended?

- A. It simplifies access by reducing the number of codes
- B. It allows login without a password
- C. It adds an extra layer of security
- D. It replaces the use of a password manager

Question 7

What is the main advantage of using a password manager?

- A. It replaces the need for antivirus software
- B. It reuses the same passwords across different online accounts
- C. It provides hints to remember your passwords
- D. It stores and generates complex passwords

Question 8

What does the 3-2-1 rule mean in terms of data backup?

- A. 3 copies, 2 of which are encrypted and 1 stored off-site
- B. 3 copies on 2 online media and 1 physical device
- C. 3 media with 2 copies, one of which is off-site
- D. 3 copies on 2 different media, with 1 stored off-site

Question 9

Why is it essential to regularly update your system and software?

- A. To improve PC speed and thus respond more quickly to cyberattacks
- B. To add hacking features
- C. To optimize video game compatibility with Bitcoin
- D. To fix known security vulnerabilities

Question 10

Why is online security crucial for Bitcoin users?

- A. Because banks insure funds in case of total bitcoin loss
- B. Because attacks lead to very heavy administrative burdens
- C. Because hacking results in the irreversible loss of bitcoins
- D. Because one can go to jail for losing bitcoins

Question 11

Why is it recommended to stay discreet about your Bitcoin holdings?

- A. To avoid attracting the attention of criminals and governments
- B. To improve borrowing capacity
- C. To avoid attracting the attention of entrepreneurs seeking funding
- D. To benefit from better exchange rates in certain countries

Question 12

Why is it important to protect your mnemonic phrase?

- A. Because losing it results in the permanent loss of bitcoins
- B. Because exchange platforms require a lot of documents to regenerate it
- C. Because losing it leads to a leak of personal data
- D. Because the blockchain is too long to regenerate it

Question 13

What does the notion of self-custody mean in the Bitcoin world?

- A. Entrusting your keys to a specialized exchange platform
- B. Keeping your public keys yourself
- C. Keeping your private keys yourself
- D. Entrusting your keys to an investment bank

Question 14

What is the main difference between trading and investing?

- A. Trading involves fixed fees, investing involves variable fees
- B. Trading is less risky than investing
- C. Trading is short-term and speculative, investing is long-term and strategic
- D. Trading is based on fundamental analysis, investing on macro trends

Question 15

Why is it advised to invest only what you can afford to lose?

- A. To maximize profits quickly in a bear market
- B. To preserve your financial security in case of loss
- C. To massively diversify your investments
- D. To borrow in order to invest more

Question 16

Which system enables fast and low-cost transactions on Bitcoin?

- A. SegWit
- B. Lightning Network
- C. Ripple Network
- D. RGB

Question 17

Up to how many decimal places can a bitcoin be divided?

- A. Eight
- B. Six
- C. Seven
- D. Twelve

Question 18

What term refers to the programmed division of the mining subsidy?

- A. Halving
- B. Coinbase
- C. Bisection
- D. Fork

Question 19

In what year was Bitcoin's Genesis block created?

- A. 2011
- B. 2010
- C. 2008
- D. 2009

Question 20

Who published the Bitcoin White Paper?

- A. Tim May
- B. Eric Hughes
- C. Satoshi Nakamoto
- D. David Chaum

Question 21

What can be the effects of orchestrated devaluation of national currencies?

- A. Economic growth and national prosperity
- B. Improvement of international trade
- C. Strengthening of democracy and individuals' natural rights
- D. Social instability and the rise of political extremism

Question 22

What is Bitcoin's major political implication?

- A. Strengthening financial regulations
- B. Promoting inflation
- C. Reducing state control over money
- D. Increasing banking centralization

Question 23

What impact do expansionary monetary policies have on fiat currency?

- A. They stabilize interest rates
- B. They dilute the value of savings
- C. They guarantee economic growth
- D. They increase purchasing power

Question 24

What is Bitcoin's main advantage in the face of monetary crises?

- A. Preserving savings against inflation
- B. Increasing interest rates
- C. Guaranteeing fixed returns
- D. Providing banking insurance

Question 25

How did Barack Obama describe Bitcoin?

- A. Digital gold
- B. A highly speculative asset
- C. A decentralized currency
- D. A Swiss bank in your pocket

Question 26

What characteristic primarily distinguishes Bitcoin from altcoins?

- A. Reputation
- B. Privacy
- C. Liquidity
- D. Decentralization

Question 27

What must users store themselves to truly own their bitcoins?

- A. Receiving addresses
- B. Private keys
- C. Exchange platform passwords
- D. Blockchain blocks

Question 28

How many maintainers are there on Bitcoin Core in 2025?

- A. 23
- B. 7
- C. 12
- D. 5

Question 29

Which platforms are recommended to avoid KYC when buying bitcoins?

- A. Trading-focused exchange platforms
- B. Bitcoin-only exchange platforms
- C. General-purpose exchange platforms
- D. Peer-to-peer exchange platforms

Question 30

Which major player designs ASICs for Bitcoin mining?

- A. Trezor
- B. Foundry USA
- C. Ledger
- D. Bitmain

Question 31

What major advantage does the layered approach offer for Bitcoin?

- A. Increasing centralization of the main network
- B. Maintaining the security of the base protocol
- C. Having the same features on the layers as on the base protocol
- D. Rapid innovation on the base protocol

Question 32

Which ones are Bitcoin sidechains?

- A. Liquid and Rootstock
- B. Jupiter and Fantom
- C. Bitcoin Cash and Bitcoin Satoshi Vision
- D. Polygon and Arbitrum

Question 33

What RGB mechanism ensures resistance to double spending?

- A. Double-signature
- B. Multi-use Seal
- C. Proof-of-Stake
- D. Single-use Seal

Question 34

Who are the inventors of the Lightning Network?

- A. Satoshi Nakamoto and Hal Finney
- B. Andreas Antonopoulos and Adam Back
- C. Thaddeus Dryja and Joseph Poon
- D. Pieter Wuille and Gregory Maxwell

Question 35

Which second-layer protocol enables near-instant payments?

- A. Bitcoin Core
- B. Sidechains
- C. Lightning Network
- D. RGB

Question 36

What storage solution is recommended for a hodler?

- A. A hardware wallet
- B. A paper wallet
- C. A custodial service
- D. A hot wallet

Question 37

What is the main purpose of defining your user profile?

- A. To adopt a general strategy that works for everyone
- B. To adopt a strategy suited to your needs
- C. To know which Bitcoin influencer to follow on social media
- D. To maximize speculation and therefore profits

Question 38

What should absolutely be avoided to ensure the security of your bitcoins?

- A. Using an open-source hardware wallet
- B. Diversifying storage methods
- C. Using a hot wallet for daily transactions
- D. Keeping your bitcoins on an exchange platform

Question 39

Which profile favors non-KYC acquisition and the use of highly secure wallets?

- A. The active user
- B. The paranoid
- C. The stacker
- D. The hodler

Question 40

Which user profile regularly accumulates bitcoins through Dollar-Cost Averaging?

- A. The paranoid
- B. The active user
- C. The hodler
- D. The stacker

Question 41

What acquisition strategy can be adopted by a hybrid hodler?

- A. Algorithmic trading
- B. Arbitrage
- C. Dollar-Cost Averaging
- D. Hacking

Question 42

What is the approximate maximum supply of bitcoins in circulation?

- A. 150 million
- B. 21 million
- C. 47 million
- D. 10 million

Question 43

What psychological quality is essential for a hodler?

- A. Emotional resilience
- B. Emotional speculation
- C. Emotional impulsiveness
- D. Emotional aggressiveness

Question 44

What is the main goal of a hodler?

- A. To speculate in the short term
- B. To make frequent bitcoin transactions
- C. To hold their bitcoins over the long term
- D. To maximize the privacy of their Bitcoin transactions

Question 45

What is the origin of the term hodler?

- A. An abbreviation of hot wallet
- B. A misspelling of hold
- C. A contraction of hodl chain
- D. An acronym for hold

Question 46

Why is it recommended to regularly transfer funds from a hot wallet to a hardware wallet?

- A. To increase wallet liquidity
- B. To reduce the risk of hacking
- C. To reduce transaction fees
- D. To optimize UTXO privacy

Question 47

What tool allows you to monitor your wallet without exposing your private keys?

- A. Watch-only Wallet
- B. Lightning Wallet
- C. Hot Wallet
- D. Custodial Wallet

Question 48

What device is recommended to secure long-term accumulated funds?

- A. Exchange platform
- B. Hot wallet
- C. Hardware wallet
- D. Lightning wallet

Question 49

What investment strategy is primarily used by a stacker?

- A. Lump-Sum
- B. Day trading
- C. Dollar-Cost Averaging
- D. Arbitrage

Question 50

What is the main goal of stacking?

- A. Short-term speculation
- B. Gradually accumulating satoshis
- C. Buying a large amount of satoshis at once
- D. Using Bitcoin for daily payments

Question 51

What solution is recommended for making low-cost Bitcoin payments?

- A. Bank account
- B. RGB layer
- C. Hardware wallet
- D. Lightning Network

Question 52

Which method allows you to offset spent bitcoins while preserving your savings?

- A. HODLing and Replace
- B. Spend and HODLing
- C. Spend and Replace
- D. Trading and Spend

Question 53

What advantage does running your own Bitcoin node provide?

- A. Speed
- B. Centralization
- C. Liquidity
- D. Independence

Question 54

Which service lists merchants accepting bitcoin worldwide?

- A. BTC Map
- B. CoinMarketCap
- C. Swiss Bitcoin Pay
- D. Bitcoin Talk

Question 55

What is the main goal of the active user?

- A. To use Bitcoin as a daily payment method
- B. To invest in bitcoin for the long term
- C. To gradually accumulate satoshis
- D. To speculate on the market

Question 56

What medium is recommended for securely backing up your mnemonic phrase?

- A. Paper backup with transparent sleeve
- B. Backup on a secure cloud
- C. Encrypted USB drive storage
- D. Metal backup with sealed opaque envelope

Question 57

What method is used to protect the on-chain traceability of transactions?

- A. Depositing into a custodial wallet
- B. Using coinjoin and payjoin techniques
- C. Frequent consolidation of UTXOs
- D. Reusing the same receiving address

Question 58

Which acquisition method is avoided by the paranoid user?

- A. Direct cash purchases at meetups
- B. Centralized platforms with KYC
- C. Bitcoin ATMs
- D. P2P matchmaking platforms

Question 59

What cold storage solution is recommended for the paranoid user?

- A. Custodial service on an exchange platform
- B. Mobile hot wallet
- C. Air-gapped or DIY hardware wallet
- D. General-purpose closed-source hardware wallet

Question 60

What is the main goal of the paranoid bitcoiner?

- A. To accumulate satoshis quickly
- B. To protect their privacy
- C. To maximize trading profits
- D. To hold their bitcoins long-term

Question 61

What is the role of the Bitcoin inheritance letter in an estate plan?

- A. To guide heirs in accessing the funds
- B. To determine the tax distribution of assets
- C. To optimize transfer fees between wallets
- D. To serve as a contract for transferring bitcoins to heirs

Question 62

Why is it recommended to write the inheritance letter in ink on paper?

- A. To increase the legal value of the document
- B. To reduce printing costs
- C. To avoid the risks associated with compromised digital documents
- D. To obtain a legally recognized signature

Question 63

What is NOT recommended when passing on access to your bitcoins?

- A. Using sealed opaque envelopes
- B. Writing an explanatory letter
- C. Splitting the information between multiple people
- D. Giving the mnemonic phrase to one person

Question 64

What major risk is incurred by disclosing too much information in the inheritance plan?

- A. Risk of theft
- B. Risk of regulation
- C. Risk of loss
- D. Risk of devaluation

Question 65

What action is essential for your heirs to recover your bitcoins without error?

- A. Providing clear instructions
- B. Using a KYC exchange platform
- C. Entrusting all private keys
- D. Frequently changing passwords

Answer Key

1. **Question 1:** C
These characteristics may indicate a pyramid scheme. If you observe them in a project, be very cautious.
2. **Question 2:** A
You should always ensure you are interacting with the correct person, and never use links provided in emails. Instead, go directly to the site manually, using your browser bookmarks.
3. **Question 3:** A
The request for an upfront payment is a common sign of fraud in this type of scam.
4. **Question 4:** A
This fraudulent technique involves artificially inflating the price to sell at a critical moment and cause the value to crash.
5. **Question 5:** D
In a Ponzi scheme, no real product is created, and payouts rely solely on the arrival of new participants.
6. **Question 6:** C
2FA requires a temporary code in addition to the password, which greatly strengthens the protection of an online account.
7. **Question 7:** D
The password manager creates strong passwords and stores them securely, allowing easy retrieval without the need to memorize them.
8. **Question 8:** D
This rule recommends having 3 copies of data on 2 different types of media, with 1 copy stored off-site for greater resilience.
9. **Question 9:** D
Updates often fix known vulnerabilities that are exploited by hackers.
10. **Question 10:** C
Without intermediaries, a hack means a definitive loss of bitcoins.
11. **Question 11:** A
Discretion protects against the risk of being targeted by scammers, jealous individuals, or thieves.
12. **Question 12:** A
The mnemonic phrase allows access to be recovered. If it is lost and the wallet is no longer accessible on its device, the bitcoins are permanently lost.
13. **Question 13:** C
Self-custody ensures that the user maintains full control of their bitcoins through their own private keys.

14. **Question 14:** C
Trading requires constant monitoring and technical skills, while investing relies on a long-term vision.
15. **Question 15:** B
Investing beyond your means (i.e., beyond your savings capacity) exposes you to excessively high financial risks.
16. **Question 16:** B
The Lightning Network is a second-layer solution that allows for fast settlement and reduces the cost of BTC transactions.
17. **Question 17:** A
A bitcoin can be divided down to the eighth decimal place, with one unit called a satoshi or sat.
18. **Question 18:** A
Halving refers to the halving of the mining subsidy every 210,000 blocks.
19. **Question 19:** D
The Genesis block, the first block of the blockchain, was mined in January 2009.
20. **Question 20:** C
The White Paper was published in late 2008 by Satoshi Nakamoto (a pseudonym).
21. **Question 21:** D
Devaluation can trigger an economic crisis through inflation, fueling social discontent and the rise of political extremism.
22. **Question 22:** C
Bitcoin is an alternative that weakens the power of state institutions over money through seigniorage and transaction censorship.
23. **Question 23:** B
Massive money printing leads to a depreciation of purchasing power, which gradually erodes the saver's purchasing power.
24. **Question 24:** A
Bitcoin offers protection against currency devaluation thanks to its predictable issuance policy.
25. **Question 25:** D
Barack Obama once referred to Bitcoin as "a Swiss bank in your pocket." Indeed, Bitcoin offers the same opportunities to everyone, regardless of status, and allows for confidential transactions.
26. **Question 26:** D
Bitcoin is renowned for its decentralization, unlike most altcoins which are more or less centralized.
27. **Question 27:** B
Without holding your private keys, you do not truly own your bitcoins.

28. **Question 28:** D
In 2025, there are five maintainers: Hennadii Stepanov, Michael Ford, Ava Chow, Gloria Zhao, and Ryan Ofsky.
29. **Question 29:** D
P2P platforms allow users to buy bitcoins directly from one another without requiring KYC.
30. **Question 30:** D
Bitmain is one of the leading manufacturers of specialized hardware for Bitcoin mining.
31. **Question 31:** B
The layered approach allows for adding functionalities without compromising the security and simplicity of the base protocol.
32. **Question 32:** A
Liquid and RSK are sidechains that have a 2-way peg with Bitcoin. The other options are not sidechains, or do not have a 2WP with the Bitcoin blockchain.
33. **Question 33:** D
The Single-use Seal leverages the fact that a UTXO can only be spent once, ensuring resistance to double spending within RGB smart contracts.
34. **Question 34:** C
Thaddeus Dryja and Joseph Poon invented the Lightning Network in 2016 to improve Bitcoin's scalability.
35. **Question 35:** C
The Lightning Network enables fast and low-cost transactions through off-chain operations outside the Bitcoin blockchain.
36. **Question 36:** A
A hodler, who holds bitcoins for the long term, should use a hardware wallet to maximize security.
37. **Question 37:** B
Knowing your profile and being able to adjust it allows you to choose acquisition and storage solutions that match your personal situation.
38. **Question 38:** D
The principle "Not your keys, not your bitcoins" highlights the importance of holding your own private keys. On an exchange platform, your bitcoins are exposed to unnecessary risks.
39. **Question 39:** B
The paranoid prioritizes privacy and security, using highly secure acquisition and storage methods.
40. **Question 40:** D
The stacker regularly buys small amounts to average out the purchase price over the long term.

41. **Question 41:** C
Dollar-Cost Averaging allows for regular bitcoin purchases to smooth out the average purchase price over time. The hodler may combine this with occasional lump-sum buys.
42. **Question 42:** B
Bitcoin is programmed to have a limited supply of approximately 21 million bitcoins.
43. **Question 43:** A
Emotional resilience allows one to endure market fluctuations without giving in to panic.
44. **Question 44:** C
A hodler aims to keep their bitcoins for many years in order to benefit from the asset's presumed growth.
45. **Question 45:** B
The term "hodler" comes from a typo on Bitcoin Talk, where "hold" was misspelled as "hodl" to express long-term holding.
46. **Question 46:** B
Transferring to a hardware wallet secures the funds by storing private keys offline.
47. **Question 47:** A
A watch-only wallet uses only public keys to display balances and transactions, without risking exposure of private keys.
48. **Question 48:** C
A hardware wallet stores private keys offline, providing enhanced security for significant amounts over the long term.
49. **Question 49:** C
DCA involves investing a fixed amount regularly to reduce the impact of market volatility on one's portfolio.
50. **Question 50:** B
The stacker invests small amounts at regular intervals to average out the purchase price over time.
51. **Question 51:** D
Lightning enables fast and low-cost transactions for daily purchases. It is the ideal tool for the active user.
52. **Question 52:** C
The Spend and Replace method involves spending bitcoins and then repurchasing the same amount to maintain your holdings.
53. **Question 53:** D
Running your own node ensures independence from third parties and protects the privacy of your transactions.

54. **Question 54:** A

BTC Map is a dedicated platform that locates merchants accepting bitcoin around the world.

55. **Question 55:** A

The active user incorporates Bitcoin into their daily life to make transactions and support its adoption.

56. **Question 56:** D

A disaster-resistant metal backup offers long-lasting protection against damage and unauthorized access. The sealed opaque envelope allows you to verify whether anyone has accessed the mnemonic phrase.

57. **Question 57:** B

Coinjoins and payjoins help improve the privacy of on-chain activity.

58. **Question 58:** B

To preserve anonymity, the paranoid user avoids platforms that require identity verification.

59. **Question 59:** C

The paranoid user favors offline storage with open-source solutions to minimize the risk of exposure.

60. **Question 60:** B

The paranoid bitcoiner primarily seeks to avoid any traceability of their transactions and identity.

61. **Question 61:** A

The inheritance letter provides clear and precise instructions so that loved ones can recover the bitcoins.

62. **Question 62:** C

A handwritten letter is less vulnerable to cyberattacks and ensures the confidentiality of the instructions.

63. **Question 63:** D

Entrusting the mnemonic phrase to a single person without additional security greatly increases the risk of theft during your lifetime.

64. **Question 64:** A

Too much information can make it easier for malicious individuals to act if they gain access to your inheritance plan.

65. **Question 65:** A

Detailed and understandable instructions ensure that your loved ones can properly access the funds.
